

WE ARE TECHO

mexico.techo.org

A youth-led non-profit organization that works in informal settlements in Latin America to create a just society without poverty.

More than 200 million people live with no proper home, no potable water, sewage, or electricity access. We work with volunteers and the community to change that.

We work alongside volunteers and members of the community creating system-changing solutions to end poverty and shape a future we all want to live in.
